

**Special session****Deadline: 15 May 2020****Title:**

*Territory and Supply Chain; a complex system*

**Organised by:**

*Abdellatif BENABDELHAFD, Le Havre University, [abenabdelhafid@gmail.com](mailto:abenabdelhafid@gmail.com)*

*Ouafae Zerouali OUARITI, Agadir IBN ZOHR University, [o.zerouali@uiz.ac.ma](mailto:o.zerouali@uiz.ac.ma)*

*Ilias MAJDOULINE, Agadir Universiapolis University, [ilias@e-polytechnique.ma](mailto:ilias@e-polytechnique.ma)*

**Abstract:**

*The territorial redevelopment occupies a very important place in the states because it is not unrelated to their level of development. In addition, redevelopment of territories encompasses several areas: economic, environmental, political, social and logistical. On the other hand, transport policy is at the crossroads of economic, social, technological and environmental issues. It requires a transversal approach in order to ensure an optimal mobility of citizens and goods. In this session, Because of growth of freight traffic,. We are interested by exchanges in the territory industrial ecosystem The treatment of this subject must be according to a multidisciplinary approach. It uses different theoretical approaches in order to understand and solve a problem relating to two complex systems: logistics system and territorial system.*

*What constraints and what information, physical, financial but also socio-cultural content characterize the complexity of these systems*

*This session presents an inventory of analysis and reflections on relationships between industry, logistics and territories.*

**List of topics:**

- TERRITORY SUSTAINABILITY ENGINEERING
- TERRITORIAL INTELLIGENCE FOR EQUITY AND SUSTAINABILITY
- INTEGRATED LOGISTICS
- TERRITORY AS A COMPLEX SYSTEM; WHAT TOOLS?

**Keywords:**

*Territory Development, Supply Chain; Complex system, Integrated logistics, sustainability*
